Evidence / Information to inform the DAF

- Based on what we've just covered, what elements might be most suitable to take forward as common themes in a DAF (e.g. buffers, seasonality, species-grouping behaviour)?
- Choose top 3 if your list is long (for feedback)

Stakeholder Engagement, Facilitation & Mediation

Sensitivity Scores as a proxy + Displacement Matrix Approach

Groups 1, 2, 3

- What are the merits/issues of the matrix approach?
- Should it be a part / component of the DAF?; if so – how?
- How should these updated sensitivity scores be used with the matrix?

Groups 4, 5

- Is there sufficient evidence to support use of particular displacement and mortality rates?
- What is the evidence for spatial extent of displacement for different species

CEH Displacement Model + Integrating collision, barrier & displacement effects

Groups 1, 2, 3

- How could the CEH approach be applied more widely?
- How might it fit in the future DAF?

Groups 4, 5

- How can interacting impacts be dealt with in DAF?

RKP

Stakeholder Engagement, Facilitation & Mediation

Developing a Habitat Loss Method for assessing displacement

- Should the habitat loss approach form part of / a component of the DAF?
- If so, how?

RKP

Stakeholder Engagement, Facilitation & Mediation

Other considerations for a future DAF

- What else should / could form part of the DAF?

RKP

Stakeholder Engagement, Facilitation & Mediation

Bringing it Together

- Is complex or simple modelling the solution to displacement impact assessment?
- 2. Should we be treating displacement as a habitat-loss versus year-on-year effect?
- 3. Is there a sliding scale of DAF approaches for less versus more sensitive species? (E.g. for less sensitive species, or even all species, is there a need for a DAF to cover the non-breeding season).
- 4. Taking a) simple and b) complex DAF modelling approaches, how do we integrate breeding and non-breeding season displacement effects and impacts within any future framework?
- 5. How do we integrate/isolate interacting impacts in any future DAF?
