

Sub-model 1. Temporary or Permanently Attached Epifauna

1. Regional to Global Drivers

2. Water Column Processes

3. Local Processes/Inputs at the Seabed

4. Habitat and Biological Assemblage

5. Output Processes

6. Local Ecosystem Functions

7. Regional to Global Ecosystem Functions

**Legend**

**Magnitude of Influence**

- Small
- Medium
- Large

**Driver Relevance to Infralittoral/Circalittoral**

- Low Relevance Infralittoral
- High Relevance Infralittoral
- Low Relevance Circalittoral
- High Relevance Circalittoral

**Degree of Natural Variability**

- Low natural variability
- Moderate natural variability
- High natural variability

Version 1.0  
Please see accompanying report for model restrictions and limitations
