

Shallow Sublittoral Mixed Sediment

- 1. Regional to Global Drivers
- 2. Water Column Processes
- 3. Local Processes/Inputs at the Seabed
- 4. Habitat and Biological Assemblage
- 5. Output Processes
- 6. Local Ecosystem Functions
- 7. Regional to Global Ecosystem Functions

Legend

Driver Relevance to Infralittoral/Circalittoral

Low Relevance Infralittoral

High Relevance Infralittoral

Low Relevance Circalittoral

High Relevance Circalittoral

Degree of Natural Variability

Low natural variability

Moderate natural variability

High natural variability

Interaction Types

Feedback

Driving Influence

Positive Interaction

Negative Interaction

Version 1.0

Please see accompanying report for model restrictions and limitations
