Issue	Date	Status / Changes
Draft 1	18 December 2015	First draft submitted to client
Final	1 April 2016	Final draft submitted to client

## **Appendix C**

### **Shading boundaries for presenting mean and median SOSI scores**

## I Shading boundaries for presenting mean and median SOSI scores

- I The frequency distribution of mean and median SOSI scores in all offshore licence blocks are presented in Figures C1 and C2 respectively. These were used to assess and set the boundaries between low, moderate, high, very high and extremely high sensitivity of seabird concentrations to oil pollution.

**Figure C1** Frequency distribution of median SOSI scores in oil licence blocks with 60, 70, 80 and 90 percentiles.
