

Appendices to the UK General Implementation Report Annex A of the 2019 UK Article 12 EU Habitats Directive Report

Appendix I – Natura 2000 (SPAs) summary statistics for metropolitan UK only (based on the UK method of defining sites by their constituent ‘marine components’)

NB. The following table is supplementary to the table in Annex A Section 3 (Natura 2000 (SPAs) – site classification (Art. 4). It includes information on SPAs with ‘marine components’ (i.e. those sites which include qualifying marine habitats and/or species as defined and identified by the UK’s Statutory Nature Conservation Bodies) and the corresponding terrestrial SPAs as per this method. This method is used for defining the UK Marine Protected Area network.

3 Natura 2000 (SPAs) – site classification (Art. 4)		
Site classification at the national level. Where appropriate, give figures separately for the surface areas of the terrestrial and marine components of sites (as defined in the Explanatory notes and guidelines).		
	Number of SPAs	Surface area of SPAs
3.1 All SPAs	274	37,606.8km ²
3.2 Terrestrial area of sites (excluding all sites as defined as sites with marine components)	(no information requested)	14,933.9km ²
3.3 Sites with marine components*	109	22,672.9km ^{2**}
3.4 Date of database used	September 2018	

* For further information on SPAs with marine components in the UK see <https://hub.jncc.gov.uk/assets/07078ed3-496d-432b-974e-1754b47536c7>.

** Of this area total of ‘sites with marine components’ that are SPAs, 1,195.5km² occurs above Mean High Water (i.e. is effectively terrestrial).

Appendix II – Natura 2000 (SPAs) summary statistics for metropolitan UK only

NB. The following table is supplementary to the table in Annex A Section 3 (Natura 2000 (SPAs) – site classification (Art. 4). It includes information on metropolitan UK Natura 2000 sites only.

3 Natura 2000 (SPAs) – site classification (Art. 4)		
Site classification at the national level. Where appropriate, give figures separately for the surface areas of the terrestrial and marine components of sites (as defined in the Explanatory notes and guidelines).		
	Number of SPAs	Surface area of SPAs
3.1 All SPAs	274	37,606.8km ²
3.2 Terrestrial area of sites (excluding marine area)	(no information requested)	16,012.3km ²
3.3 Marine sites	137	21,594.5km ²
3.4 Date of database used	September 2018	

Appendix III – Natura 2000 (SPAs) summary statistics for Gibraltar only

NB. The following table is supplementary to the table in Annex A Section 3 (Natura 2000 (SPAs) – site classification (Art. 4). It includes information on Gibraltar’s Natura 2000 sites only.

3 Natura 2000 (SPAs) – site classification (Art. 4)		
Site classification at the national level. Where appropriate, give figures separately for the surface areas of the terrestrial and marine components of sites (as defined in the Explanatory notes and guidelines).		
	Number of SPAs	Surface area of SPAs
3.1 All SPAs	2	56.87km ²
3.2 Terrestrial area of sites (excluding marine area)	(no information requested)	2.005km ²
3.3 Marine sites	1	54.865km ²
3.4 Date of database used	September 2018	

Appendix IV – Set of conservation measures and management plans for Natura 2000 sites (SPAs) summary statistics for metropolitan UK only

NB. The following table is supplementary to the table in Annex A Section 4 (Set of conservation measures and management plans for Natura 2000 sites (SPAs). It includes statistics on conservation measures and management plans for metropolitan UK Natura 2000 sites only.

4 Set of conservation measures and management plans for Natura 2000 sites (SPAs)		
	Number of SPAs	Proportion (%) of the SPA network area
4.1 Necessary conservation measures have been established and are applied	180	43.5
4.2 Conservation measures have been set out in a comprehensive management plan or a similar instrument	111	58.6

Appendix V – Set of conservation measures and management plans for Natura 2000 sites (SPAs) summary statistics for Gibraltar only

NB. The following table is supplementary to the table in Annex A Section 4 (Set of conservation measures and management plans for Natura 2000 sites (SPAs). It includes statistics on conservation measures and management plans for Gibraltar’s Natura 2000 sites only.

4 Set of conservation measures and management plans for Natura 2000 sites (SPAs)		
	Number of SPAs	Proportion (%) of the SPA network area

4.1 Necessary conservation measures have been established and are applied	2	100
4.2 Conservation measures have been set out in a comprehensive management plan or a similar instrument	2	100
