

Family	Common name	Scientific name	Demographic parameter	Age class	Age (years)	Mean	Standard deviation	0.025 confidence interval	0.975 confidence interval	Standard error	Study area	Region	Country	Number of years in study	Data collection method (MR - mark-recapture; RR - Ring-recovery; Joint ring-recovery and mark-recapture)	Estimation method (VR - variable recapture; CR - constant recapture)	Study Period	Reference (all references are listed in the main report)	Cited by
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	survival	adult		0.700							Germany					Fuchs 1982	Garthe and Huppopp 2004
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	survival	adult	≥4	0.750		0.690	0.800	0.028			Europe (including UK)		RR	VR		Abt and Konter 2009	
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	survival	immature	1-3	0.620							Europe (including UK)		RR	VR		Abt and Konter 2009	
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	productivity			1.250							Europe (including UK)		RR	VR		Abt and Konter 2009	
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	productivity			1.300							UK					Prestt and Jefferies 1969	
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	productivity			1.275	0.035					Average						Prestt and Jefferies 1969; Abt and Konter 2009	
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	age of recruitment		2								Europe (including UK)		RR	VR		Abt and Konter 2009	
Grebe	Great crested grebe	<i>Podiceps cristatus</i>	age of recruitment		2													Cramp and Simmons 1977	

To assess **quality**, the estimate is scored on the number of years considered by the study, the number of individuals included per year and whether an estimation of the range or error is available with the estimation. To assess **representation**, the estimate is scored on whether the data reflects a UK-based study, includes recent data (<10 years old), and whether the trajectory of the study colony reflects the current UK population trend. Consequently, this scoring system assesses representation at the national scale. Each criterion receives a 0 for “no”, 1 for “partially or unknown and therefore requiring further evaluation”, and 2 for “yes”, scoring quality and representation individually out of 6. Where an estimate combines several studies that conflict on specific criteria, a 1 was awarded to signify partial characterisation. Notation: A - adult, J - juvenile, S - stable, Mixed - mixed, I - increasing, D - decreasing, U - unknown.

#### Data Quality

Species	Age	Current UK Pop. Trend	Survival				Productivity				Age of recruitment				Missed breeding				Dispersal			
			≥5 years	>30 Individual yr <sup>-1</sup>	Range of values available	Total	≥5 years	>30 Individual yr <sup>-1</sup>	Range of values available	Total	≥5 years	>30 Individual yr <sup>-1</sup>	Range of values available	Total	≥5 years	>30 Individual yr <sup>-1</sup>	Range of values available	Total	≥5 years	>30 Individual yr <sup>-1</sup>	Range of values available	Total
